

# Commercial Services

## Client Centered

TLI Solutions, Inc., (a TechLaw Company) has a unique blend of legal, regulatory, technical, and scientific environmental consulting expertise.

## Environmental Management and Compliance Assurance

### Environmental Management Systems

In helping our many clients develop an Environmental Management Systems (EMS) or achieve ISO 14001 certification, we have pioneered the use of a Systems Consistent approach at multiple facilities, resulting in considerable savings to our clients. Our ISO 14001 EMS Toolkit offers leading-edge design templates, procedures, design sheets, decision support tools, and training modules that significantly eases the path to ISO 14001 certification. We have developed performance metrics for our clients, with added emphasis on emerging issues, such as greenhouse gas emissions and sustain-ability.

### Compliance Assurance & Risk Management

Our due diligence and environmental forensics experts have assessed environmental liabilities and contaminant sources in complex transactions ranging from a major railroad merger to the acquisition of a radioactive waste handling and treatment facility.

### Regulatory Consulting & Policy Development

We drafted Kentucky's solid waste statute; assisted the U.S. Environmental Protection Agency of Georgia in conducting an assessment of possible amendments to the State's Hazardous Site Response Act regulations; and we prepared policy guidance documents for use by

government and private sector entities in complying with New Mexico's Resource Conservation and Recovery Act (RCRA) program.

## Settlement and Alternative Dispute Resolution Services

### Settlement Services – Cost Allocation & Cost Recovery

As arbitrators, mediators, settlement counselors, and expert witnesses, we have used increasingly sophisticated techniques and models to allocate cost and assess National Oil and Hazardous Substances Pollution Contingency Plan (NCP) compliance. We have been highly successful in helping parties reach settlements in dozens of highly complex Comprehensive Environmental Response, Compensation, and Liability Act, (CERCLA) and RCRA cost recovery or contribution cases.

### Public Involvement Planning & Meeting Support

We have senior staff facilitators that have convened and facilitated numerous policy dialogues, negotiated rule-makings, and public meetings. We have worked with public agencies in developing and implementing public involvement processes to help in the development of public policy and address land-use issues.

## Expert Technical and Scientific Consulting    Litigation Support and Information Management

### Remedial Project Planning & Management

We are in the forefront of the development of innovative strategies for streamlining the Corrective Action process, while focusing on comprehensive holistic management approaches to complex facility cleanups across the country.

### Site Characterization/Risk Assessment/Data Analysis

Our risk assessment team has specialized expertise in the determination of risk-based remediation goals, risk data analysis, and risk management support.

### Data Quality Assessment

We have a premier data validation group with extensive experience in a full array of parameters and matrices. We currently provide data validation, data analysis, Quality Assurance/Quality Control (QA/QC) program development, and analytical support to clients nationwide.

### Training

We have developed and conducted hundreds of training courses on a wide variety of environmental subjects at both the federal and local levels.

### Historical Research and Analysis

For over 20 years, we have been leaders in developing research techniques to locate and analyze historical information dealing with manufacturing operations and other uses at various sites. We have applied these techniques to analysis and the geographic information system (GIS) mapping of operations in entire watersheds or along miles of industrial waterways, all in an effort to identify sources of contaminants often involving the analysis of hundreds of facilities.

### Litigation Support

We have state-of-the-art document processing centers in the Washington D.C. area, Dallas, and Denver that offer document scanning, full text conversion, and coding. We recently have added scanning centers in Boston, Minneapolis, and San Francisco. Our innovative electronic discovery software and systems have been relied on in dozens of cases this past year to convert electronic file collections into searchable databases.

### Information Management

Along with our document processing capabilities, we have developed web-enabled document repositories to host client's documents and have assisted numerous clients in back-filing.
